EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Russell Gross (40,007) on 14 March 2005.

The application should be amended as follows: **cancel claims 1, 2, 4, and 5.**

REASONS FOR ALLOWANCE

The reasons for allowance, as set forth in the Final Rejection dated 21 December 2004, are repeated below:

2. Claims 6 and 7 were amended to denote that the selected segment comprises "at least three" consecutive pixels; a boundary then divides the segment into two parts, and filtering is carried out on the segment when pixels at the ends of the segment have chrominance components that agree with a similarity criterion.

The closest prior art of record (US 5,796,875 by Read) does not disclose or suggest such a feature. Read teaches that two pixels (B & C, figure 3) at the ends of a segment are compared to determine whether filtering should be carried out on the segment. However, Read's segment only consists of two pixels. The present invention proposes, e.g., selecting a segment of at least

Art Unit: 2623

three pixels that crosses a boundary, such as segment A-B-C, and then comparing pixels A & C to determine whether the segment should be filtered. See figures 2-3 of the present invention.

For these reasons, claims 6-11 are allowable.
